UFD - Regional Geology Web Map Application

Glenn Russell (Geospatial Technical Lead)
Idaho National Laboratory

https://gis.inl.gov/regionalgeology
What it is:

- Interactive Web Map Application of Geologic Spatial Data

Objectives:

- Easy to Use Online Tool for Reference and Assessment of the Geological Site Characterization.
- Publically Available, Live, and Ready for Use
Map Window Tools: Navigation, Basemap, Overview Map, Coordinate and Scale Bar
Key Banner Tools: UFD Layer List and Identify
Geological Units Tools: Depth to Salt, Shale and Crystalline Basement Rock
Near Real-Time USGS Seismic Activity for the Last Week
Additional Analyze, Navigate, and Print Tools
In Summary:

- For your ease of use, LANL’s Regional Geology GIS Database is now online and interactive.
- Encourage you to use this tool and provide us feedback for improvements, bugs, general usage.
