

**INTERNATIONAL ASTM PV INSTALLATION COMMISSIONING, OPERATIONS & MAINTENANCE (ICOMP) STANDARD PRACTICE**

***MEETING ANNOUNCEMENT***

ASTM International subcommittee E44.09 Photovoltaic Electric Power Conversion will be holding a meeting for their [WK43549](#) Practice for Installation Commissioning Operation and Maintenance Process task group on Thursday, May 8, 2014 at 8:00am until 1:00pm. This meeting will follow the [Sandia/EPRI 2014 PV Systems Symposium](#). The scope of WK43549 is to work with others around the world to guide the Installation, Commissioning, Operation and Maintenance of Photovoltaic Systems (ICOMP) by providing standards for foundational metrics and processes that enable consistent delivery and operation of quality photovoltaic systems over their useful life. This foundational effort will define the integrated process for consistent system delivery throughout the lifecycle of reliable and effective PV systems. The process will require the integration of, and raise the standards for, approved best practices to ensure maximum value for the stakeholders.

The May 8<sup>th</sup> meeting will be focused on their task groups framework document which maps out the intent of the standard including incorporations of existing practices and the development of new practices to fill industry gaps. Preregistration for this meeting is required and can be facilitated by [clicking here](#). A map and directions to the office as well as other logistical information can be found at: <http://www.epri.com/About-Us/Pages/Palo-Alto-CA.aspx>

**Date:**

May 8, 2014

**Time:**

8:00am – 1:00pm

**Address:**

EPRI Headquarters  
3420 Hillview Avenue  
Palo Alto, CA 94304
