

Dr. Till Popp is a mineralogist working since 1986 in the field of hydro-mechanical investigations on salt and crystalline rocks in the lab and in-situ scale. He earned his PhD with a petro-physical study about elastic and electrical properties of fluid-bearing crustal rocks. Since 2003 he is appointed at the Institut für Gebirgsmechanik GmbH Leipzig (IfG) as project manager, mostly responsible for research projects aiming on disposal of radioactive and toxic waste in salt and argillaceous formations. Since 2010 he is general manager of the IfG.
